"Check Valve Solutions for Industry"

DAULCO LIQUID FUEL / NATURAL GAS CHECK VALVE

DAULCO Liquid Fuel/Natural Gas Check Valve Description

Zero Leak check valves are designed to operate with both Liquid and Gas Fuels currently used in Gas Turbine Generator Industry. Daulco Elastomeric #225 offers exceptional compatibility with Fuels and High Temperatures found in today's applications.

Please consult factory for additional information.

Design Features & Benefits

- Flows to 15 GPM
- Zero Leak in the Check Direction
- Operating Temperatures from 0 to 600 ° F
- Crack Pressures pre-set at factory
- Tamper Resistant Design
- "In the Field" Re-build Friendly

Construction Features

- Stainless Steel
- Daulco Elastomeric #225
- Available crack pressures to 150 P.S.I.G.
- "Improved" one piece design

Standard Models Available

Part #	Crack Pressure	Non <u>OEM</u> Replacement Valves for:
51118	120 PSID	361A2943P001 & P007 357A1941P001 & P007
51120	100 PSID	361A2943P002, P004, P005 & P006 357A1941P002, P004, P005 & P006
51122	45 PSID	361A2943P003 & P008 357A1941P003 & P008
